

INCREASE THE TOBACCO AGE TO 21

Minnesotans agree: We can do more to prevent kids from becoming addicted.

A national consensus is growing to prevent addictions and future health problems by **ensuring that those who sell tobacco products do so to adults who are 21 and older.**

Minnesotans for a Smoke-Free Generation supports this movement.

RAISING THE TOBACCO AGE TO 21 WILL PREVENT YOUTH TOBACCO USE AND SAVE LIVES.

Research predicts a **25 percent reduction in smoking initiation among 15-17-year-olds,**¹ and **30,000 fewer young smokers in Minnesota.**²

IN 2017, YOUTH TOBACCO USE IN MINNESOTA ROSE FOR THE FIRST TIME IN 17 YEARS.³

- **Over 26 percent** of Minnesota high-school students use tobacco.³

ALMOST 95 PERCENT OF ADDICTED ADULT SMOKERS STARTED SMOKING BY AGE 21.⁴

- **Increasing the age gap between kids and those who can legally buy tobacco** will help remove access to tobacco products from the high-school environment.

THERE IS BROAD SUPPORT FOR RAISING THE TOBACCO AGE TO 21.

- A national survey shows that **75 percent** of adults favor increasing the minimum **sale age for tobacco to 21.**⁵
- **Even 70 percent** of smokers are in support of raising the minimum legal age.⁵

STATE AND LOCAL GOVERNMENTS ARE TAKING ACTION TO PROTECT YOUTH.

- Several cities in Minnesota have raised the age to 21.
- **Five states and more than 290 localities** in the United States have raised the tobacco age to 21.
- Needham, Massachusetts, found that smoking among high-school students **fell by nearly half** after raising the age to 21.⁶

NICOTINE IN ANY FORM HARMS THE ADOLESCENT BRAIN . . . AND YET BIG TOBACCO STILL MARKETS TO YOUTH.

- Nicotine is addictive, and adolescents are especially vulnerable to the health impacts of tobacco use.⁷
- The tobacco industry aggressively markets to youth and young adults to recruit replacement smokers and guarantee profits.^{8,9}

Minnesotans for a Smoke-Free Generation supports policies that reduce youth smoking and help end the death and disease associated with tobacco use, including raising the tobacco age to 21, limiting youth access to menthol-, candy- and fruit-flavored tobacco, keeping tobacco prices high and funding future tobacco prevention and cessation efforts.
